

Hi There,

My name is Faizan Ali, and with six months of experience in full-stack web development, I am confident I will be an excellent fit for 10pearls Search's next Associate Software Engineer. My experience has provided me with the innovative and technical skills necessary to successfully provide your company with multifaceted technical solutions across a wide range of software platforms.

At Cache-Limited, I am responsible for developing and maintaining two high-traffic ecommerce websites. I oversee the building of innovative systems architecture via JavaSpring and Nodejs, HTML5, CSS3/SASS, JavaScript/React, MySQL. I was instrumental in structuring several internal systems comprising order entry/management tools, conversion/revenue reporting, production workflow tracking, and designed custom REST APIs built in NodeJS. I also successfully collaborate on solutions with our product, QA, and marketing teams to offer the best user experience to build higher customer lifetime value.

It would be a pleasure to learn more about i2c needs, and I would welcome the chance to provide further insight into my knowledge of project management, technical abilities, personal attributes, and track record of success in building revenue-generating web technologies compatible across multiple platforms, browsers, and devices.

Thank you for considering my candidacy for this position. I hope to hear from you soon to schedule an interview.

Sincerely,

Faizan Ali
